### Consejería de Desarrollo Sostenible

**Decreto 32/2021, de 6 de abril, por el que se modifica el Decreto 215/2010, de 28 de septiembre, por el que se aprueba el Plan de Ordenación de los Recursos Naturales de la Sierra Norte de Guadalajara y se inicia el procedimiento para la declaración del Parque Natural de la Sierra Norte de Guadalajara. [2021/4060]**

Por Acuerdo del Consejo de Gobierno de 5 de febrero de 2008, publicado en el DOCM de 21 de febrero de 2008, se inició el procedimiento para la elaboración y aprobación del Plan de Ordenación de los Recursos Naturales de la Sierra Norte de Guadalajara.

El Plan de Ordenación de los Recursos Naturales de la Sierra Norte de Guadalajara, aprobado mediante Decreto 215/2010, de 28 de septiembre, prevé el establecimiento de la figura de protección de Parque Natural para los terrenos definidos en el Anejo I del citado Plan en los términos municipales de El Cardoso de la Sierra, Cantalojas, Galve de Sorbe, Condemios de Arriba, Condemios de Abajo, Albendiego, Ujados, Miedes de Atienza, La Miñosa, Prádena de Atienza, Atienza, Robledo de Corpes, Gascueña de Bornova, Hiendelaencina, Villares de Jadraque, Bustares, Las Navas de Jadraque, El Ordial, Arroyo de las Fraguas, La Huerce, Monasterio, Zarzuela de Jadraque, La Toba, Semillas, Tamajón, Arbancón, Cogolludo, Retienda, Valdesotos, Tortuero, Puebla de Valles, Valdepeñas de la Sierra, Valverde de los Arroyos, Majaerayo y Campillo de Ranas, todos de la provincia de Guadalajara, por reunir los requisitos señalados en el artículo 41 de la Ley 9/1999, de 26 de mayo, de Conservación de la Naturaleza de Castilla-La Mancha.

Así mismo, el plan propone una zona periférica de protección en su Anejo III en 6.708 ha, en los términos municipales de Cantalojas, Zarzuela de Jadraque, La Toba, Tamajón, Cogolludo, Tortuero, Valdepeñas de la Sierra destinada a prevenir y evitar la incidencia de impactos externos.

En la Ley 5/2011, de 10 de marzo, de Declaración del Parque Natural de la Sierra Norte de Guadalajara, se define el ámbito territorial del Parque Natural al igual que en el artículo 9 se establece la zona periférica de protección, ambos en los mismos terrenos de los términos municipales propuestos en el PORN en sus anejos I y III.

Cabe destacar que los 35 términos municipales integrados total o parcialmente en el Parque Natural de la Sierra Norte de Guadalajara incluyen un total de 55 núcleos urbanos de los que 43 están enclavados total o parcialmente en el perímetro del Parque Natural. En estos núcleos no existe zona periférica de protección ajustándose el límite del parque natural al de cada núcleo.

La Ley 9/1999, de 26 de mayo, incluye, entre los principios generales recogidos en el artículo 3, "La mejora de la calidad de vida de todas las comunidades rurales, con especial atención a las involucradas en proyectos concretos de conservación y la promoción de modelos de desarrollo rural ambientalmente adecuados y sostenibles, armonizando las actividades productivas con la conservación de la naturaleza".

El objetivo principal del Plan de Ordenación de los recursos Naturales de la Sierra Norte de Guadalajara es adecuar la gestión de sus recursos naturales, en especial los protegidos, a los principios que señala el artículo 3 de la Ley 9/99, de 26 de mayo, de Conservación de la Naturaleza.

A lo largo de los años transcurridos desde la declaración del Parque Natural de la Sierra Norte de Guadalajara en marzo de 2011, se ha podido comprobar que el hecho de dotar al entorno de los núcleos urbanos, generalmente antropizado y carente de recursos naturales de conservación prioritaria, del mismo nivel de protección asignado al resto del territorio del Parque Natural, puede entrar en conflicto con el desarrollo de iniciativas y actividades que promuevan el desarrollo sostenible de estos pueblos, sin afeción a los valores ambientales del Parque Natural.

Una vez examinados los estudios que dieron lugar a la aprobación del PORN de la Sierra Norte de Guadalajara así como los informes del Servicio de Medio Natural y Biodiversidad de la Consejería de Desarrollo Sostenible en Guadalajara y la información disponible respecto a los recursos naturales protegidos en el ámbito del Parque Natural de la Sierra Norte de Guadalajara cabe afirmar que las zonas descritas en la modificación de los Anejos III y V.III que se pretenden desafectar de la figura de Parque Natural y pasar a zona periférica de protección con este decreto no contienen elementos destacables para la conservación de los recursos naturales, careciendo de formaciones arboladas, matorrales evolucionados o

hábitats de interés especial o de interés comunitario relevantes y siendo terrenos antropizados en el entorno de cascos urbanos y zonas con infraestructuras agropecuarias o usos industriales.

Por todo ello, se ha considerado que estas zonas periurbanas que no reúnen las características señaladas por el artículo 41 de la Ley 9/1999, de 26 de mayo, de Conservación de la Naturaleza, para los Parques Naturales, pasen a tener la consideración de Zonas Periféricas de Protección del Parque Natural de la Sierra Norte de Guadalajara.

Con ello se gradúa el esfuerzo de la protección, ajustando así la regulación de usos y actividades al valor ambiental real de la zona de la que se trate.

Respecto al Capítulo 5 del Plan de Ordenación de los Recursos Naturales de Régimen general de los usos y actividades en el Parque Natural de la Sierra Norte de Guadalajara, existen algunos aspectos que, para favorecer la gestión y mejorar la conservación del espacio, es necesario matizar, como la regulación de obras hidráulicas que puedan ser necesarias en el futuro, teniendo en consideración el contexto de cambio climático y armonizando la regulación sobre este aspecto establecida en otros Parques Naturales de la región y, por otro lado, la necesidad de modificar la regulación de determinadas actividades que son precisas para la adecuada gestión del espacio natural protegido, en la zona de protección especial del parque natural.

Además, la Reserva Fluvial Río Pelagallinas, declarada según el Decreto 287/2003, de 7 de octubre, en los términos municipales de Albendiego, Condemios de Arriba, Condemios de Abajo, Gascueña de Bornova y Prádena de Atienza, está íntegramente enclavada en el territorio del Parque Natural de la Sierra Norte de Guadalajara, y se considera que, por optimización de la gestión y por los elevados valores naturales que alberga, sería conveniente su inclusión íntegra en el Parque Natural de la Sierra Norte de Guadalajara, con la consideración de zona de protección especial.

De acuerdo con lo expuesto, a propuesta del Consejero de Desarrollo Sostenible y previa deliberación del Consejo de Gobierno en su reunión del día 6 de abril del 2021.

Artículo único. Modificación del Decreto 215/2010, de 28 de septiembre, por el que se aprueba el Plan de Ordenación de los Recursos Naturales de la Sierra Norte de Guadalajara.

El Decreto 215/2010, de 28 de septiembre, por el que se aprueba el Plan de Ordenación de los Recursos Naturales de la Sierra Norte de Guadalajara y se inicia el procedimiento de declaración del Parque Natural de la Sierra Norte de Guadalajara, queda modificado en los siguientes términos:

Uno.- Se modifica el punto 4.2. del Capítulo 4 del Anejo I del Decreto 215/2010, de 28 de septiembre, por el que se aprueba el Plan de Ordenación de los Recursos Naturales de la Sierra Norte de Guadalajara y se inicia el procedimiento de declaración del Parque Natural de la Sierra Norte de Guadalajara, quedando este punto como sigue:

“4.2. Zonificación y regímenes de protección de los espacios naturales que se proponen.

De acuerdo con la valoración ambiental indicada, se propone la siguiente zonificación y regímenes de protección:

Para la zona delimitada en el Anejo I del presente plan, se propone la figura de protección de Parque Natural, con la denominación de Parque Natural de la Sierra Norte de Guadalajara. Esta zona, con una superficie estimada en 116.953 hectáreas, cumple los requisitos señalados por el artículo 41 de la Ley 9/1999, de 26 de mayo, de Conservación de la Naturaleza para su declaración como Parque Natural, por tratarse de un área natural, poco transformada por la ocupación o explotación humana, que en razón a la belleza de sus paisajes, la representatividad de sus ecosistemas y la singularidad de su flora, fauna y geomorfología, posee unos valores ecológicos, estéticos, educativos y científicos cuya conservación merece una atención preferente.

Un 80% del territorio propuesto como Parque Natural forma parte de la Red Natura 2000, a través de la designación por la Comisión Europea de las siguientes figuras: ZEC-ZEPA Sierra de Ayllón ES0000164-ES0000184. Todo ello supone que entre los recursos naturales objeto de protección del Parque Natural figurarán, además de los recursos naturales protegidos señalados por la Ley 9/1999 de Conservación de la Naturaleza, los hábitat y las especies respectivamente señalados por los Anejos I y II de la Directiva 92/43/CEE, y el Anejo I de la Directiva 2009/147/CEE, que deberán mantenerse en un estado de conservación favorable, de acuerdo con lo establecido en la normativa comunitaria, nacional y regional de aplicación.

En relación con los espacios naturales protegidos del Parque Natural del Hayedo de Tejera Negra, Reserva Natural del Macizo del Pico del Lobo-Cebollera y Reserva Fluvial Río Pelagallinas, ubicados en el ámbito del PORN, quedarán integrados dentro del Parque Natural de la Sierra Norte con el reconocimiento de zona de protección especial, estando sus límites descritos en el Anejo II del PORN. Esta zona tendrá básicamente la regulación de usos que se estableció para la Reserva Natural del Macizo del Pico del Lobo-Cebollera. La integración en el nuevo Parque Natural de estos tres espacios protegidos, no va a suponer la pérdida de singularidad, ya que estos espacios representan la biodiversidad y los valores naturales del conjunto de Parque Natural y, por ende, serán referencia indisoluble al mismo.

El territorio propuesto como Parque Natural comprenderá por tanto la totalidad del área definida en el Acuerdo de inicio del PORN, a excepción de las siguientes zonas:

- En los términos de Robledo de Corpes y Hiendelaencina se ha excluido una zona de 768 ha formada por los terrenos ubicados al este de la carretera CM-1001, mientras que en el término municipal de San Andrés del Congosto se ha redefinido el límite quedando excluida una zona de 3,5 ha.
- Los núcleos urbanos, y los entornos de estos adscritos a la zona periférica de protección, así como los sectores urbanizables con Programa de Actuación Urbanizadora, aprobado de los municipios comprendidos en el ámbito del PORN quedan excluidos del ámbito territorial del Parque Natural. Así mismo, los nuevos sectores urbanizables que aprueben los instrumentos de planeamiento urbanístico según lo dispuesto en el presente Plan, quedarán excluidos del espacio protegido.
- La zona periférica de protección de 8.019 has, cuyos límites se describen en el Anejo III, que afecta al perímetro exterior del territorio del Parque Natural y al entorno de los núcleos urbanos, con el objeto de amortiguar la presión socioeconómica que inevitablemente genera la actividad humana en los núcleos de población. Por ello, y para evitar en esas zonas los impactos ecológicos o paisajísticos de influencia negativa que la referida actividad humana pueda producir, se ha previsto en esas zonas periféricas una regulación de usos menos restrictiva que la prevista para el Parque Natural. La definición de esta zona periférica de protección se ampara en el artículo 48.1 de la Ley 9/1999, de 26 de mayo, de Conservación de la Naturaleza, donde establece que "En el entorno de los espacios naturales protegidos cuyas características y necesidades de protección así lo requieran, podrán establecerse, por el Consejo de Gobierno, zonas periféricas de protección con el fin de amortiguar la incidencia de impactos externos negativos o evitar su generación con repercusión directa o indirecta sobre el espacio que se pretende proteger, así como para garantizar el mantenimiento de los procesos ecológicos esenciales."

Por consiguiente, en el régimen de usos, aprovechamientos y actividades del presente Plan se establecen tres zonas a regular: el Parque Natural, para el que se establece un régimen general de protección, la zona del Parque Natural definida como de protección especial del Macizo del Pico del Lobo-Cebollera-Hayedo de Tejera Negra-Río Pelagallinas y la zona periférica de protección."

Dos.- Se modifica el punto 5.1.3. del capítulo 5 del Anejo I del Decreto 215/2010, de 28 de septiembre, por el que se aprueba el Plan de Ordenación de los Recursos Naturales de la Sierra Norte de Guadalajara y se inicia el procedimiento de declaración del Parque Natural de la Sierra Norte de Guadalajara, quedando como sigue:

## II.III. Delimitación del Río Pelagallinas.

La zona de protección especial “Río Pelagallinas” comprende una superficie de 362 ha y se encuentra en los términos municipales de Albendiego, Condemios de Abajo, Condemios de Arriba, Gascueña de Bornova y Prádena de Atienza, en la provincia de Guadalajara.

Comprende la totalidad de los terrenos del interior de los límites que se definen a continuación. Para esta delimitación los puntos de coordenadas UTM están referidos al Huso 30 bajo la notación (coordenada X, coordenada Y), y sigue el sentido de las agujas del reloj.

Partiendo del punto de coordenadas UTM (491852, 4560457), situado sobre la carretera local Aldeanueva de Atienza-Condemios de Arriba, se continúa en dirección este, por el camino que discurre paralelo al margen izquierdo del río Pelagallinas. Este camino alcanza el paraje conocido como “Cabeza de la Angostura”, hasta llegar a un cortafuego en el punto de coordenadas (496068, 4560901), por el cual se continúa en dirección NW, hasta el punto

de coordenadas (495592, 4561244). Desde este punto se cruza un afluente del río Pelagallinas por una pequeña vaguada, en dirección N, hasta llegar a un camino por este margen izquierdo, en el punto de coordenadas (495606, 4561401). Se prosigue por este camino con dirección S hasta, una vez pasado el paraje conocido como "Pradera del Rancho", en el punto de coordenadas (495811,4559761), emplear una línea paralela al cauce del río Pelagallinas y separada del mismo 50 metros de ancho, hasta el punto de coordenadas (496302, 4559501). Desde este punto se vuelve a emplear un camino en dirección E-SE, y a partir del punto de coordenadas (499335, 4558124) en las cercanías de la localidad de Prádena de Atienza, se continúa por una línea paralela al cauce del río Pelagallinas y separada del mismo 25 metros, a cada lado del río, hasta la confluencia de éste con el río Bornova, en el punto de coordenadas (501354, 4557020).

Siguiendo por la margen derecha del río Pelagallinas, y habiendo empleado la línea antes mencionada, desde la desembocadura del río Pelagallinas en el río Bornova, hasta el punto de coordenadas (499337, 4558027) en las cercanías de Prádena de Atienza, se continúa por el camino en dirección W-NW, que discurre por el paraje conocido como "Praina de Arriba". Se sigue por dicho camino hasta el punto de coordenadas (498057, 4558766), desde el que se emplea línea paralela al cauce del río Pelagallinas y separada del mismo 200 metros. Esta línea alcanza una pista forestal, en el punto de coordenadas (495695, 4559648). Se continúa por dicha pista, en dirección primero N y luego W, hasta alcanzar la carretera local Aldeanueva de Atienza-Condemios de Arriba en el punto de coordenadas (491713, 4560268), entre el pk 23 y el 24. Se cruza esta carretera, y siguiendo en el margen derecho del río Pelagallinas, se sigue por la pista forestal en dirección W hasta el punto de coordenadas (489570, 4559858). Desde este punto y hasta alcanzar un cortafuego en el punto de coordenadas (489206, 4559558), se utiliza una línea paralela al cauce del río Pelagallinas y separada del mismo 50 metros. A partir de este punto situado sobre el cortafuego, se continúa por una vaguada en dirección S-SW, hasta llegar a otra pista forestal en el punto de coordenadas (488966, 4558374). Se continúa por esta pista hasta el punto de coordenadas (489149, 4559857), desde el que emplea línea paralela al cauce del río Pelagallinas y separada del mismo 75 metros, ya en la margen izquierda. Se alcanza así una pista forestal en el punto de coordenadas (491284, 4560415), por la que se prosigue en dirección primero NE y luego SE, hasta alcanzar el punto inicial de la presente descripción.
